In view of these enormous numbers, it's not altogether surprising that insects can be found just about everywhere (and certainly everywhere that humans have staked a claim). There are insects that live in Antarctica, in cracks in the snow, and in hot springs in Yellowstone, in water where temperatures approach the boiling point.

Bugs in the System Graeme Morris "Venturi is a gas giant" a huge ball of gas that tried to be a star, but never quite made it. Now it just moans and grumbles and throws out magnetic storms once in a while. The atmosphere would suffocate you except that you'd probably freeze first, or be torn apart by the thousand kilometer an hour winds.
