1.3. The Building Blocks of Fast and Scalable Data Access. Having covered some of the core considerations in designing distributed systems, let's now talk about the hard part: scaling access to the data. Most simple web applications, for example, LAMP stack applications, look something like Figure 1.5. Figure 1.5: Simple web applications

Scalable Web Architecture and Distributed Systems

Simple web applications involve the Internet, an app server, and a database server. Developing scalable web applications allows to grow, and there are two challenges of access “ to the app server and to the database. In building scalable web applications, the app server usually reflects shared-nothing architecture.
