

cell gene and molecular pdf

Molecular Plant is a Cell Press partnership journal (Press Release). Established in 2008 and sponsored by the Institute of Plant Physiology and Ecology, Shanghai Institutes for Biological Sciences, Chinese Academy of Sciences, and the Chinese Society of Plant Biology, Molecular Plant is dedicated to serving the plant science community by publishing novel and exciting findings with high ...

Cho et al. report that Drp1 that is the executioner for mitochondrial fission can reduce the mitochondrial membrane potential (MMP) during the mitochondrial division, and this new action helps identify bad sectors in the interconnected mitochondria.

New Articles: Molecular Cell

Molecular Cell is a companion to Cell, the leading journal of biology and the highest-impact journal in the world. Launched in December 1997 and published monthly, Molecular Cell defines the field of molecular biology with a relatively small number of significant papers, up to 15 articles per issue. Coverage will extend from structure to human diseases, concentrating on molecular analyses.

Cell biology (also called cytology, from the Greek $\kappa\upsilon\tau\omicron\varsigma$, kytos, "vessel") is a branch of biology that studies the structure and function of the cell, which is the basic unit of life. Cell biology is concerned with the physiological properties, metabolic processes, signaling pathways, life cycle, chemical composition and interactions of the cell with their environment.

Cell biology - Wikipedia

In biology, a gene is a sequence of nucleotides in DNA or RNA that codes for a molecule that has a function. During gene expression, the DNA is first copied into RNA. The RNA can be directly functional or be the intermediate template for a protein that performs a function. The transmission of genes to an organism's offspring is the basis of the inheritance of phenotypic trait.

INTRODUCTION. Despite extensive preclinical advances, to date, there has been very limited application of DNA nucleases for therapeutic gene editing (). Here, we describe first-in-human use of transcription activator-like effector nuclease (TALEN) gene-edited T cells in two infants with refractory relapsed B cell acute lymphoblastic leukemia (B-ALL) and the successful induction of molecular ...
