

chapter 3 cells and pdf

Learning Objectives By the end of this chapter you should appreciate that: n the components of the nervous system have specific functional roles; n there is regional specialization within the brain; n nerve cells (neurons) have to use energy to maintain their electrical potential gradients, and that neurons achieve this through the generation of action potentials which perturb these gradients;

Folding, modification, and degradation of proteins The life of a protein can briefly be described as: synthesis, folding, modification, function, degradation.

Chapter 3

The cell (from Latin cella, meaning "small room") is the basic structural, functional, and biological unit of all known living organisms.A cell is the smallest unit of life.Cells are often called the "building blocks of life". The study of cells is called cell biology. Cells consist of cytoplasm enclosed within a membrane, which contains many biomolecules such as proteins and nucleic acids.
