Welcome to Heat-Exchanger USA Shell & Tube Heat Exchangers. View/Download our heat exchanger dimension sheet. 24 hour replacement heat exchangers and tube bundles

Compact Heat Exchanger | ITT Standard Heat Exchanger

A heat exchanger is a device used to transfer heat between two or more fluids. In other words, heat exchangers are used in both cooling and heating processes. The fluids may be separated by a solid wall to prevent mixing or they may be in direct contact. They are widely used in space heating, refrigeration, air conditioning, power stations, chemical plants, petrochemical plants, petroleum ...

General Applications. The applications discussed above are the more common applications for helical coil heat exchangers, but their use in industry is far greater and more diverse.

Helically Coiled Heat Exchangers Offer Advantages

Brazed Plate Heat Exchangers offer the highest level of thermal efficiency and durability in a compact, low cost unit. The corrugated plate design provides very high heat transfer coefficients resulting in a more compact design.

DTL Series Heat Exchangers. Reliable Heat Transfer Technology. Thermo Dynamics Limited manufactures an exceptional line of high effectiveness heat exchangers.

Thermo Dynamics Ltd. - Tube and Shell Heat Exchangers

Plate heat exchangers provide highly efficient heat transfer between two liquids without allowing them to mix. They are ideal for managing coolant pressure differences, and for isolating sensitive equipment from potentially damaging liquids.

Brazed Plate Heat Exchangers Universal solutions for industrial and domestic applications Quality Heat Exchangers

Quality Heat Exchangers

A plate-fin heat exchanger is a type of heat exchanger design that uses plates and finned chambers to transfer heat between fluids. It is often categorized as a compact heat exchanger to emphasise its relatively high heat transfer surface area to volume ratio. The plate-fin heat exchanger is widely used in many industries, including the aerospace industry for its compact size and lightweight ...

Plate fin heat exchanger - Wikipedia

The Armstrong PFX plate and frame heat exchangers consist of a number of specially corrugated metal plates assembled in a frame and bolted between two pressure plates (one fixed and one adjustable.) Armstrong plate designs are optimized for best water-to-water heat transfer providing enhanced performance especially in HVAC applications.
