A computer is a device that can be instructed to carry out sequences of arithmetic or logical operations automatically via computer programming. Modern computers have the ability to follow generalized sets of operations, called programs. These programs enable computers to perform an extremely wide range of tasks.

Computer - Wikipedia

Computer science is the study of processes that interact with data and that can be represented as data in the form of programs. It enables the use of algorithms to manipulate, store, and communicate digital information. A computer scientist studies the theory of computation and the practice of designing software systems. Its fields can be divided into theoretical and practical disciplines.

In Brief: Good design makes documents easier to use, helps documents stand out from other pieces of information, and lends credibility to document creators. Librarians across library types and departments provide instruction and training materials to co-workers and library users. For these materials to be readable and accessible, they must follow guidelines for usable document design.
