java generics and collections pdf
Generics are a facility of generic programming that were added to the Java programming language in 2004 within version J2SE 5.0. They were designed to extend Java's type system to allow "a type or method to operate on objects of various types while providing compile-time type safety".The aspect compile-time type safety was not fully achieved, since it was shown in 2016 that it is not ...

Generics in Java - Wikipedia
The Java collections framework (JCF) is a set of classes and interfaces that implement commonly reusable collection data structures.. Although referred to as a framework, it works in a manner of a library.The JCF provides both interfaces that define various collections and classes that implement them.
