Soil pH is a measure of the acidity or basicity (alkalinity) of a soil. pH is defined as the negative logarithm (base 10) of the activity of hydronium ions (H<sup>+</sup> or, more precisely, H<sub>3</sub>O<sup>+</sup> + aq) in a solution. In soils, it is measured in a slurry of soil mixed with water (or a salt solution, such as 0.01 M CaCl<sub>2</sub>), and normally falls between 3 and 10, with 7 being neutral.
