Modeling The Enterprise IT Infrastructure

Business process modeling (BPM) in business process management and systems engineering is the activity of representing processes of an enterprise, so that the current process may be analysed, improved, and automated. BPM is typically performed by business analysts, who provide expertise in the modeling discipline; by subject matter experts, who have specialized knowledge of the processes being ...

Welcome to the Unified Modeling Language (UML) website. Feel free to browse news and articles on UML, success stories, available certification and training, along with the current specifications. UML is OMG's

most-used specification, and the way the world models not only application structure, behavior, and architecture, but also business process and data structure.

Welcome To UML Web Site!

The mission of the Bay-Delta Office (BDO) is to plan facilities and implement actions in the Sacramento-San Joaquin Delta to improve water quality, water supply and reliability, and the ecosystem. The Office develops and maintains computer simulation models to analyze the effects of projects and actions proposed or undertaken by the Department or other agencies.

Modeling Civil War Ironclads - Walter Nelson

Figure 1 indicates that the items towards the top of the stack are described in greater detail than those towards the bottom. There's a few important things to understand: It's a significant risk to do detailed modeling up front. The article "Examining the Big Requirements Up Front (BRUF) Approach" addresses this problem in detail. The requirements in the current iteration must be understood in ...
