Using Moon Phases as A Planting Guide - Vegetable Gardener

Forest gardening is a low-maintenance sustainable plant-based food production and agroforestry system based on woodland ecosystems, incorporating fruit and nut trees, shrubs, herbs, vines and perennial vegetables which have yields directly useful to humans. Making use of companion planting, these can be intermixed to grow in a succession of layers, to build a woodland habitat.

The term lunar effect refers to real or imaginary correlations between specific stages of the roughly 29.5-day lunar cycle and behavior and physiological changes in living beings on Earth, including humans. In some cases the purported effect may depend on external cues, such as the amount of moonlight. In other cases, such as the approximately monthly cycle of menstruation in humans (but not ...

Healthy pinkish lips. Anemia tends to make you pale, and this is often most obvious at the lips [PDF link]. If your lips seem paler than usual, that's an indicator of anemia. This tip also works for people of all skin tones, even though what's pale for you may be a different shade than what's pale for someone else.

I received a recent comment from a gardener inquiring about harvesting ripe watermelons from plants that had volunteered in her home garden. There's no guarantee that those rogue plants will produce mature fruits but if they do there are a number of techniques that can be employed to ensure that you harvest the mature watermelons at their peak.
