ABB is a leading provider of integrated power and automation solutions for conventional and renewable based power generation plants.

### **Power Generation | ABB**

The world's population has doubled since 1950, along with a four-fold increase in fossil fuel use.<sup>1</sup> 2015 was the Earth's warmest year on record (since 1880) by a wide margin.<sup>2</sup> All of this has prompted dramatic policy shifts regarding renewable energy and the environment. And the future of power generation is more apparent than ever.

Wind power is the use of air flow through wind turbines to provide the mechanical power to turn electric generators. Wind power, as an alternative to burning fossil fuels, is plentiful, renewable, widely distributed, clean, produces no greenhouse gas emissions during operation, consumes no water, and uses little land. The net effects on the environment are far less problematic than those of ...

Next Generation Power Engineering Inc. . Next Generation has provided unique and innovative power solutions to both the marine and industrial markets for over 20 years. Next Gen first started by manufacturing its patented ultra compact line of marine and industrial gen-sets, but now supplies many markets with products including gen-sets, power units and compressors, as well as unique generator ...

### **NEXT GENERATION POWER ENGINEERING INC.**

A power station, also referred to as a power plant or powerhouse and sometimes generating station or generating plant, is an industrial facility for the generation of electric power. Most power stations contain one or more generators, a rotating machine that converts mechanical power into electrical power. The relative motion between a magnetic field and a conductor creates an electrical current.
