Max Wind Speed - spiderstaging.com

Wind-chill or windchill, (popularly wind chill factor) is the lowering of body temperature due to the passing-flow of lower-temperature air.. Wind chill numbers are always lower than the air temperature for values where the formula is valid. When the apparent temperature is higher than the air temperature, the heat index is used instead.

Wind chill - Wikipedia

Water Vole Ratty from 'Wind in the Willows' was in fact a water vole, which should not be confused with brown rats. They have blunt noses and shorter tails with small ears and can be seen in or near to watercourses. They have declined massively in recent years due to habitat loss and predation by feral American mink.
