A parasite is an organism that lives on or in a host and gets its food from or at the expense of its host. Parasites can cause disease in humans. Some parasitic diseases are easily treated and some are not. The burden of these diseases often rests on communities in the tropics and subtropics, but parasitic infections also affect people in developed countries.

Diuretics are important not only for reducing swelling but also for treating the medical conditions caused by swelling in different parts of the body. There are different types of diuretics prescribed in conventional medicine. However, each type has its own disadvantages and side effects. Natural diuretics, on the other hand, are largely safe and effective too.
